AnyTone  
BT-01

The HSBT\_ICON\_V1\_20201113\_DL6EK is the original icon file to which I only changed  
the icons related to GPS and APRS.

It's an adoption of Francesco (IK8JHL) icon set available for AT-D878/578.

I really appreciate your open work together mindset, thank you Francesco!

For feedback/suggestions reach out to 'Anytone-DMR DL' group on Telegram (see source  
reference).

73 de Joachim, DL6EK

**Changes:**

**GPS**

**APRS**

**Green = Sat reception OK**

**Gray = no Sat reception**

The update must be performed using the CP Editor or the attached QX\_Firmware\_Update.  
Turn on the BT-01 by holding down PTT + PF2, the screen will show UPDATE MODE,  
then load the file HSBT\_ICON\_V1\_20201113\_DL6EK.spi, select correct COM port and  
press Write.

Power of AFTER the flash writing is completed and power on in BT or Cable mode.
