

## Icon Updating

1. Press and hold both the PTT key and the PF2 key (lower side key) simultaneously while powering on the radio. The LCD will display "UPDATE MODE."
2. Connect the radio to your computer using the programming cable.
3. Open the CPS software. Navigate to Set->Set COM, and select the correct COM port.
4. Navigate to Tools->Firmware and Icon Update.

5. Click Open Update File.
6. Navigate to the Maverick\_Icon\_Vxxx folder, and choose the Maverick\_Icon\_Vxxx.spi file.
6. Ensure that Com Speed set to 921600, and the Duplex checkbox is checked.
7. Click Write, and wait until complete.
  - a) Note: The Radio Display will not change after the update until you turn the radio off and back on.
8. Reboot the radio when the update is finished.
