

How to Import your AT-D878UVII Plus Codeplug into your Maverick

What you will need

- AT-D878UVII CPS
 - Download [here](#)
- Maverick CPS
 - Download [here](#)
- Spreadsheet editing software such as Excel or LibreOffice Calc
 - If you do not have Excel, you can download LibreOffice [here](#)

Steps

1. Open the AT-D878UVII Plus CPS.
2. Navigate to **File->Open** and open your existing AT-D878UVII Plus codeplug. If you do not have the codeplug saved to your computer, read your radio using the CPS to obtain its radio programming data.
3. Navigate to **Tool->Export**, and click **Export All(Default CSV FileName)**. This will open a File Explorer window. Navigate to the location where you would like to store the exported files.
 - a. During the export process, several files will be saved at the chosen location. Therefore, it is highly recommended to create a folder to store them in.
 - b. Make a note of the location that was chosen to store the exported files. In the next step, you will need to locate them.
4. Open the spreadsheet editing software. Within the software, use the file opening menu to locate the directory where the exported files were saved in the previous step. Select and open the file titled **Channel.CSV**.

- a. If prompted to specify import details, choose the following options before clicking **OK**:
 - From row: **1**
 - Separated by: **Comma**
 - String delimiter: **"**
 - Other Options: **Format quoted field as text**
5. Observe the top row containing the data categories. Make the following changes:
 - a. Change **Contact** to **Contact/TG**
 - b. Change **Contact Call Type** to **Contact/TG Call Type**
 - c. Change **Contact TG/DMR ID** to **Contact/TG TG/DMR ID**.
6. Save the file and close it.
7. Open the Maverick CPS.
8. Read the Maverick radio.
9. Navigate to **Tools->Import**. If a message box explaining details about CSV importing appears, click **OK**.
10. Click **Import From File List**. Navigate to the directory the CSV files were exported to, and open the LST file, which is located in the same directory as the exported CSV files.
11. Wait for the importing process to complete. If there is a large digital contact list, it may take several minutes to complete.
12. Adjust any other CPS parameters as necessary.
13. Write to the Maverick radio.
